### Wing Clip 60

**Function:** The 60 Wing Clip is made from stainless steel and powder coated in matt black. It is designed to act as a hidden fixing for many of Wallbarn decking products. Because it has an A2 Fire Class Rating, it is best suited to work with our Fire rated decking systems. The clip has been specially designed to match the width of all Wallbarn aluminium joists (60mm), so the silver aluminium joists cannot be seen from above.

Will fit boards manufactured with a standard side milling profile, the wing of the clip grips into the grooves at the sides to hold deck boards in place securely without need for top screws or any visible fixings. These are secured with Wallbarn's self-tapping stainless steel screw for Wallbarn Aluminium rails/joists or applicable screws for WPC/composite and timber joists.

The clip will provide an approximate 6mm gap between each deck board.

A matching Start/End clip is also used to secure the first and last board. This Clip is also powder coated in matt black and meets Class A2 fire rating.

## Technical Data

- Fire Rating:** Class A2
- Compatibility:** They can be used with decking boards manufactured with standard milling side profile, including X-Deck porcelain, C-Deck fibre cement fire rated decking and Thermo Bamboo deck boards.
- Performance:** Mould and Water Resistant  
Resistant to deterioration by UV light, damp and normal atmospheric conditions in the long term
- Material:** Stainless Steel
- Recycled:** No
- Recyclable:** Yes
- Accessories:** Start/End Clip  
Wallbarn stainless steel self tapping screw for aluminium joists.  
Wallbarn wood or WPC/composite screw for timber & composite joists  
Also available in a 30mm variation
