Border Shield

Product Description

BorderShield is an anti-tipping perimeter safety system designed to secure paving slabs at the exposed edges of exterior raised flooring installations. It prevents perimeter slabs and cut pieces from shifting or tipping, providing a stable and safe edge detail on terraces, balconies, podiums, and similar external areas. The profile connects directly to Mega Balance pedestal heads and incorporates an integrated, height adjustable safety support, suitable for build ups of up to 470 mm. Border Shield can be cut to length to suit perimeter layouts, allows height adjustment after installation, and remains fully inspectable for ongoing access and maintenance.

Compatibility

Compatible with Mega Balance adjustable pedestal range

Performance

Manufactured from high strength polypropylene, BorderShield offers excellent resistance to atmospheric agents, including UV exposure, moisture, and harsh weather conditions. The material also provides good resistance to acidic and alkaline substances, ensuring long term durability in external environments. Mechanical properties remain stable over time, maintaining consistent performance throughout the service life of the installation. Fire reaction classification: E (fl).

Included Accessory

N/A

Recycled Product

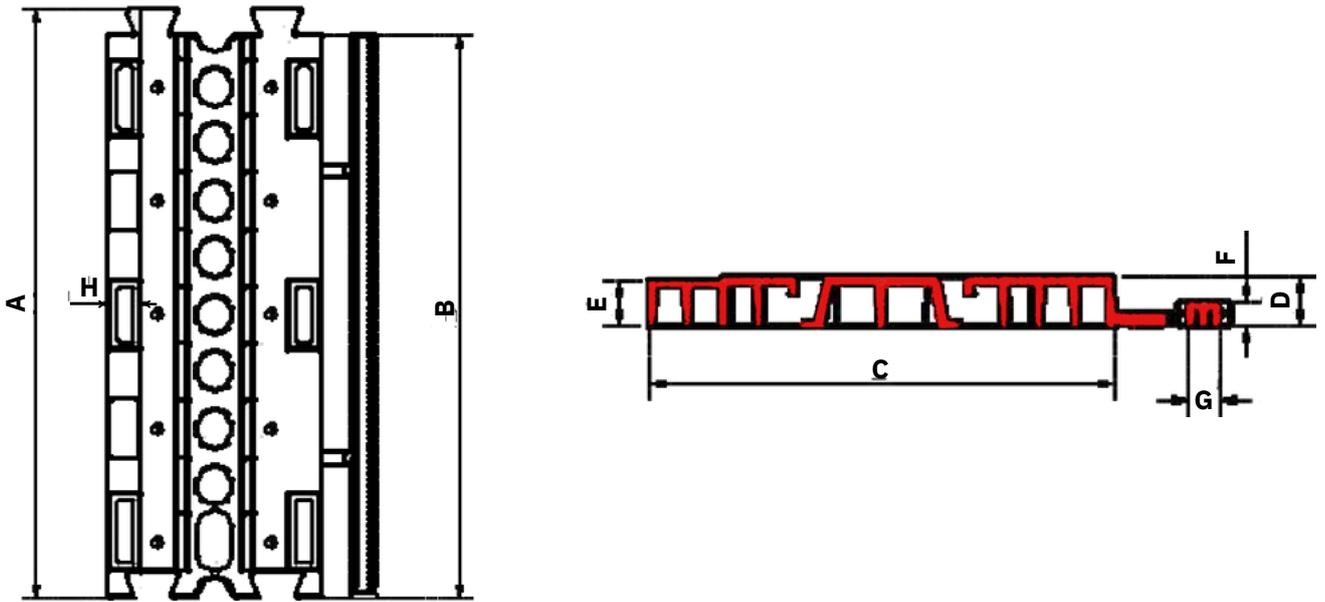

Yes

Material

Polypropylene : PP-T20%

Recyclable

Yes
